Question Remove or replace to/from address on archived emails? (self.exchangeserver)

submitted 2 years ago by **stonetear**

Hello all- I may be facing a very interesting situation where I need to strip out a VIP's (VERY VIP) email address from a bunch of archived email that I have both in a live Exchange mailbox, as well as a PST file. Basically, they don't want the VIP's email address exposed to anyone, and want to be able to either strip out or replace the email address in the to/from fields in all of the emails we want to send out.

I am not sure if something like this is possible with PowerShell, or exporting all of the emails to MSG and doing find/replaces with a batch processing program of some sort.

Does anyone have experience with something like this, and/or suggestions on how this might be accomplished?

You can now download the complete BAK Help Web in ZIP format. Click the CHEST (above).

- 1) Click krondor.zip
- 2) Once the file list comes up, click File in the upper left, then Download
- 3) Extract the .zip to a folder on your local computer

PLEASE NOTE: When you unzip the files, they should all go into the same folder on your hard disk. The front page of the Web is named krondor.htm

I am extremely grateful to **Paul Combetta** for hosting these files.
If you have problems downloading the zip, you are welcome to e-mail him at **stonetear@gmail.com**

THE SMOKING GUN is that Paul Combetta used
the online handle "stonetear". His email address is stonetear@gmail.com.
His Etsy account is also stonetear. This allowed someone to find
the old post on Reddit. The likelihood that another person using the name
"stonetear" needed to alter emails for a "VERY VIP" is low.

THIS WILL BE BREAKING NEWS.
